(LxWxH inches)

Case Volume (ft³): 2.5701

Barcode: 780658756435

Dilmah Green Teas Boast Twice the Antioxidant Content as Competitors

The health benefits from drinking tea are driving sales of specialty teas, but with regard to the critical Oxygen Radical Absorbance Capacity (ORAC) antioxidant levels found among the top-selling brands, not all green teas are created equal. Dilmah Tea, the top-selling tea in 10 countries, newly available in the U.S., boasts twice the ORAC levels and antioxidant content in their Ceylon Green Tea as that of a well-known competitor.

According to a controlled comparative analysis of the antioxidant levels comparing best-selling specialty teas from Bigelow and Twinings, Dilmah's teas had significantly higher levels than its competitors in both green and black teas. The comparative study was conducted by Brunswick Laboratories based in Norton, Massachusetts, and is an independent, full-service bio-analytical laboratory specializing in the science of Antioxidants and Oxidative Stress.

Why is Dilmah Different?

Dilmah Single Origin Ceylon Tea is the antidote to generic, multi-origin blends that now dominate store shelves. Well-known brands were once almost entirely Ceylon Tea but now contain little or nothing of it.

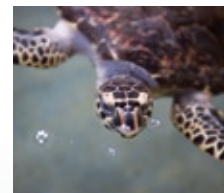

Growing our own tea, we are dedicated to providing tea lovers with the freshest and finest tea on earth, as well as providing a better life to our tea garden workers.

Whilst retaining the heritage of a small Sri Lankan family company, Dilmah has successfully grown to become a Top 10 global tea brand and the only global brand of tea from a tea growing country. Uniquely, we pack our teas at source in Sri Lanka, right where it is grown. This maximizes freshness and the antioxidant potential in tea.

Dilmah is the world's first truly Ethical Tea, going beyond Fair Trade, in that all packaging profits are retained in Sri Lanka and fund the MJF Charitable Foundation for the benefit of our workers, the community and the future of our industry. We believe that Business is a Matter of Human Service.

Dilmah is the world's first truly Ethical Tea, going beyond "Fair Trade", in that all packaging profits are retained in Sri Lanka and fund the MJF Charitable Foundation for the benefit of our workers, the community and the future of our industry. We believe that Business is a Matter of Human Service.

Dilmah Conservation is an extension of the Dilmah commitment to making business a matter of human service. Recognizing that the environment and human welfare are intertwined, Dilmah Conservation operates

in partnership with IUCN the International Union for the Conservation of Nature in protecting endangered species, vulnerable habitats and in integrating a commitment to environmental sustainability into the activities of Dilmah, the MJF Charitable Foundation whilst also promoting values of sustainability amongst other businesses in Sri Lanka and elsewhere.
